7:00 – 8:00 Dinner  
8:00 – 9:00 Program  
9:00 – 9:30 Follow-up / Social

**Topic:** Baltimore Re-Lighted – Trends in Lighting Projects in the Baltimore Area

**Description:** Baltimore has seen a renaissance in new construction, adaptive reuse, and renovation (upgrade) projects and lighting has played an important role in improving how we see and utilize these spaces. The latest technology of lighting and controls has allowed us create experiences never before possible. Projects such the new Baltimore Peninsula (Port Covington), Guinness Brewery, the Warehouse at Camden Yards, renovations at M&T Bank Stadium, Ravens Under Armour Performance Center, and the B&O Railroad Museum have highlighted classic architecture, created visual interest to new buildings, and created an improved customer experience for all those who visit the venues.

**Speaker:** Ms Magdalena DiDomenico, the principal of MAG-Lighting Design, LLC (MLD) is an experienced lighting designer with a wide expertise in sustainable projects sensitive to energy consumption. She adds European education and experience to her American credentials, creating an interesting flavor of lighting design for every project she approaches. With twenty - five years of professional experience in the lighting industry, Ms. DiDomenico has an in-depth understanding of all aspects of the lighting design process. Magdalena obtained her education (M.S. in Lighting Design & Engineering) in Europe, beginning her lighting design career in 1999. After moving to the US in 2002, she continued practicing lighting design along with earning her American credentials: LC and LEED certifications. Educated overseas and inspired by lighting concepts experienced in Paris, Berlin, Prague and London, MAG-Lighting Design, LLC brings a bold, elegant, European design approach that is unique to its projects. MAG-Lighting Design’s clients include major sport clubs, hospitality brands, private corporations, health care facilities and school systems.
