

IEEE-IAS INDUSTRY APPLICATIONS SOCIETY (BALTIMORE)

MEETING

The Institute of Electrical and Electronic Engineers - Industry Applications Society are pleased to announce the upcoming Dinner Meeting. Information regarding the meeting is as follows:

Date: Wednesday, October 21st. 2026

Time: 6:00 – 7:00 Social Hour / Open Bar

7:00 – 8:00 Dinner

8:00 – 9:00 Program

9:00 – 9:30 Follow-up / Social

Topic: Elevator Codes and Standards for Safe, Code-Compliant Designs

Description: Elevator Codes and Standards for Safe, Code-Compliant Designs

As elevator technologies and system configurations continue to evolve, understanding the electrical codes and standards governing their design and installation is increasingly important. This presentation will examine the Division 26 requirements applicable to traditional machine-room elevators, machine-room-less systems, traction elevators, and hydraulic elevators, with particular attention to updates in the 2026 edition of NFPA 70 and the 2022 edition of ASME A17.1.

Attendees will learn about shunt-trip requirements, emergency and standby power, short-circuit current ratings, available fault-current identification, auxiliary contacts for battery-lowering systems, and illumination requirements for machinery spaces, hoist ways, and elevator landings. The presentation will also address IBC and NEC requirements and offer practical design guidance for the placement of elevator controllers and other critical electrical equipment.

Speaker: Jeanne S. Tebera, P.E., CFPS, is a Principal with Henry Adams, LLC, in Baltimore and a recognized specialist in elevator systems and code compliance. Her experience includes the coordination of electrical distribution, lighting, HVAC, plumbing, fire protection, fire alarm, and emergency-control systems for new elevator installations and modernization projects. She has led multidisciplinary teams on major elevator projects throughout the Mid-Atlantic and Great Lakes regions.

Jeanne serves on the Maryland State Fire Prevention Commission and is a contributing member of the ASME A17 Emergency Operations and Hoist way Committees. She is also a member of the National Association of Elevator Safety Authorities and chairs the American Institute of Architects' Electrical MasterSpec Engineering Review Committee, providing technical guidance for Divisions 14, 26, 27, and 28.

\$75.00 (Members Paid-in-Advance)
